

Breathing Between the Lines

Methodology

Johnathan Padilla, Hadrien Picq

ParsonsTKO-TechSoup Global **2020 Data Strategy Mentorship Program**

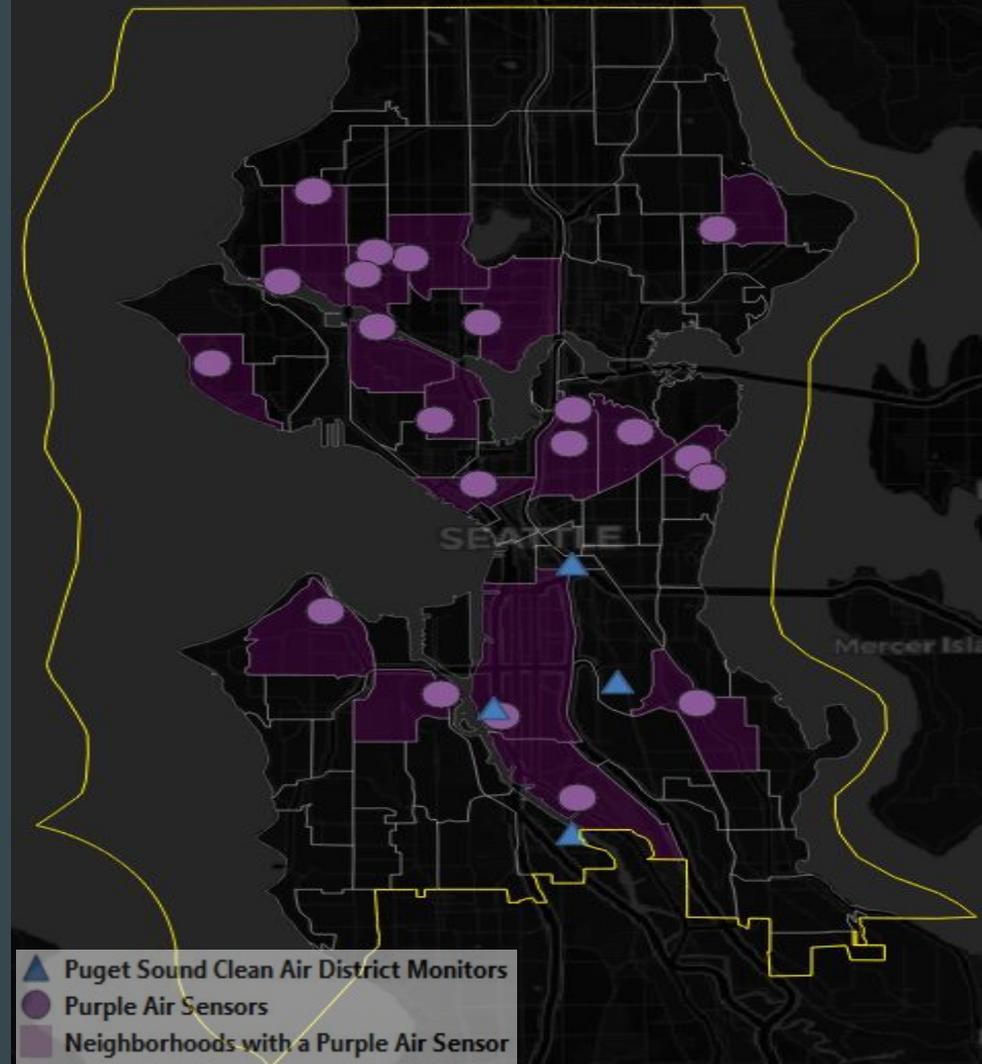

Leveraging **Community-Based Participatory Research**
in air monitoring to identify **local burdens** of pollution

Insight #1: Proximity to Purple Air (low-cost) sensors

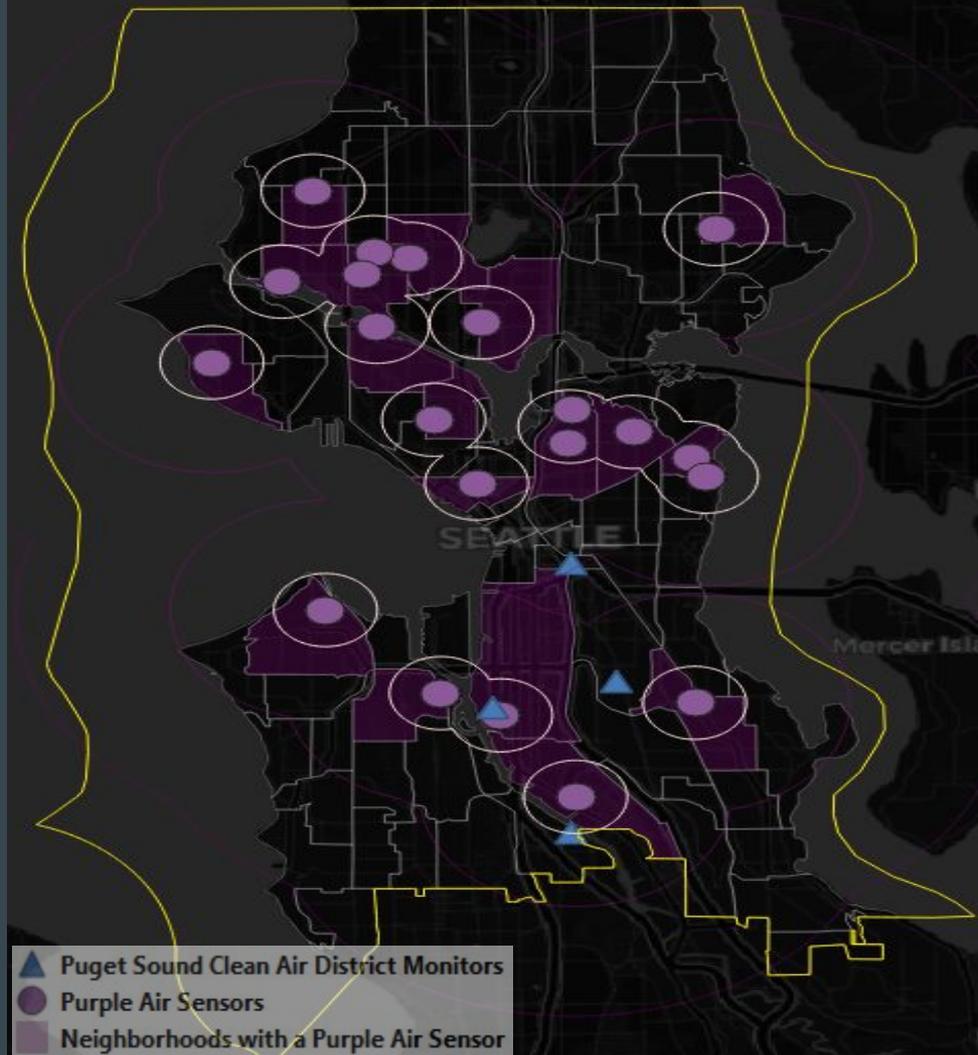

30%

of Seattle's population lives within 1,000 m of a Purple Air sensor
(2010 Census)

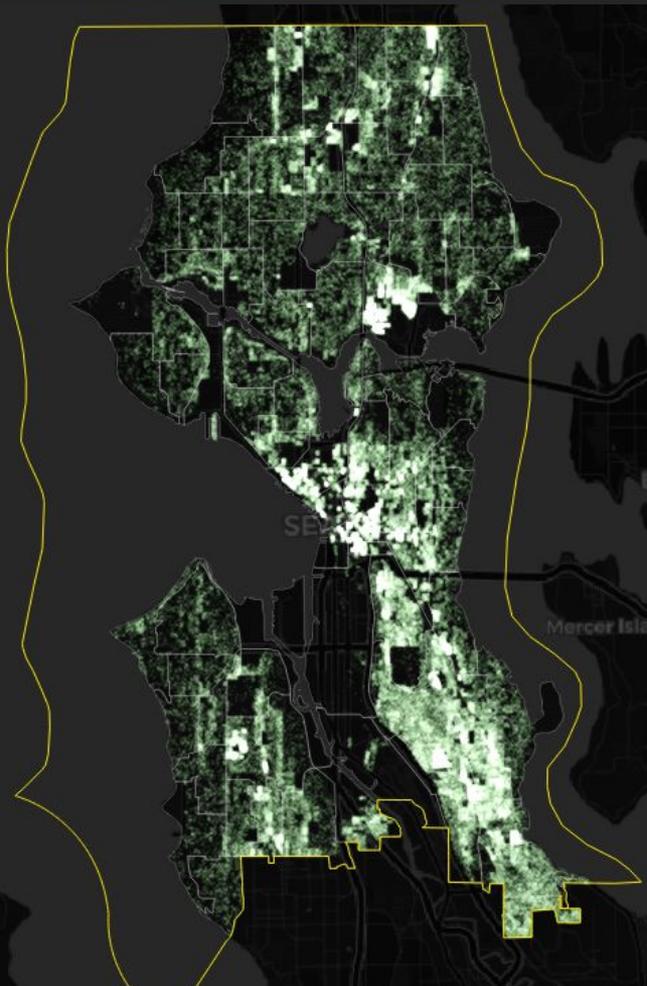

20 sensors across 18 neighborhoods

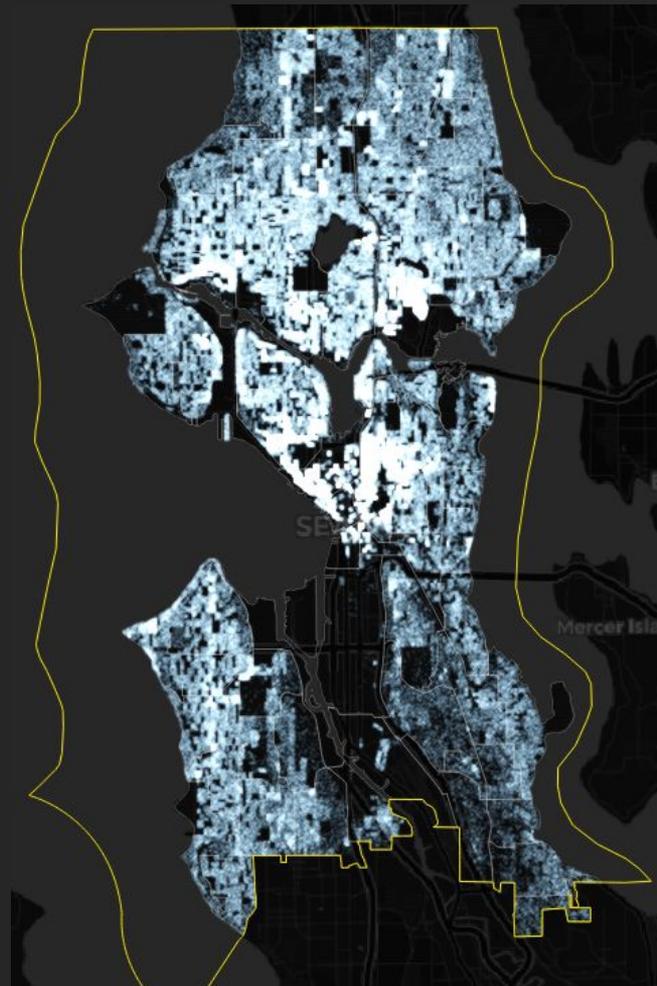

Looking at 1,000 m proximity to a
Purple Air sensor

Insight #2: The current distribution of Purple Air does not reflect the representation of Seattle's minority population

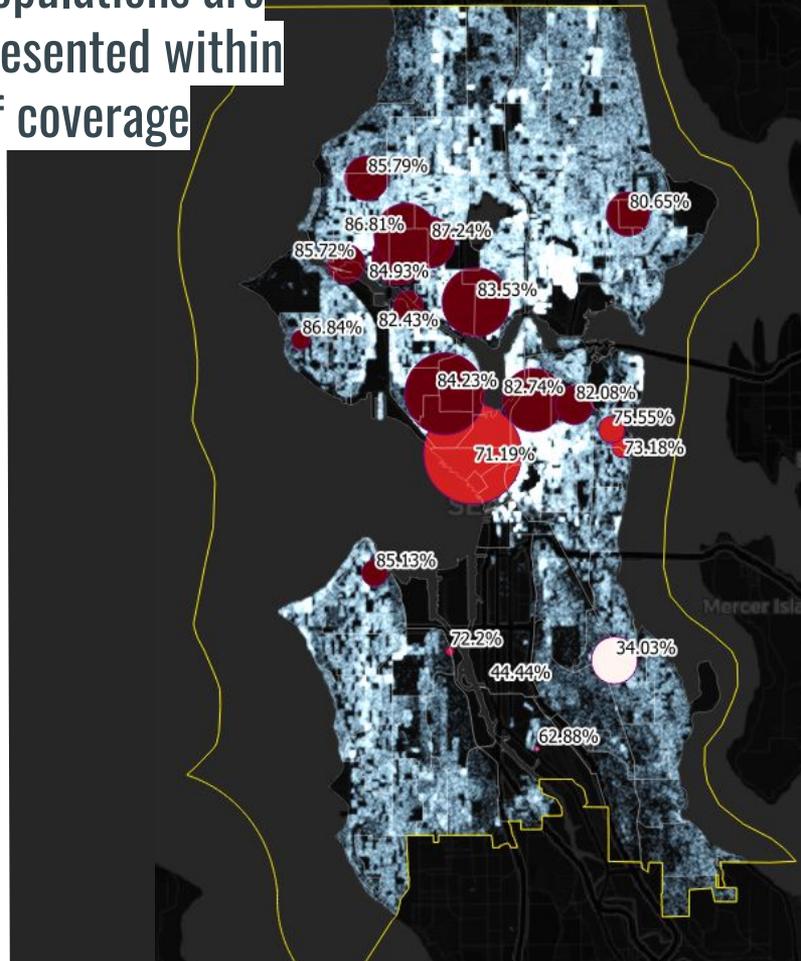

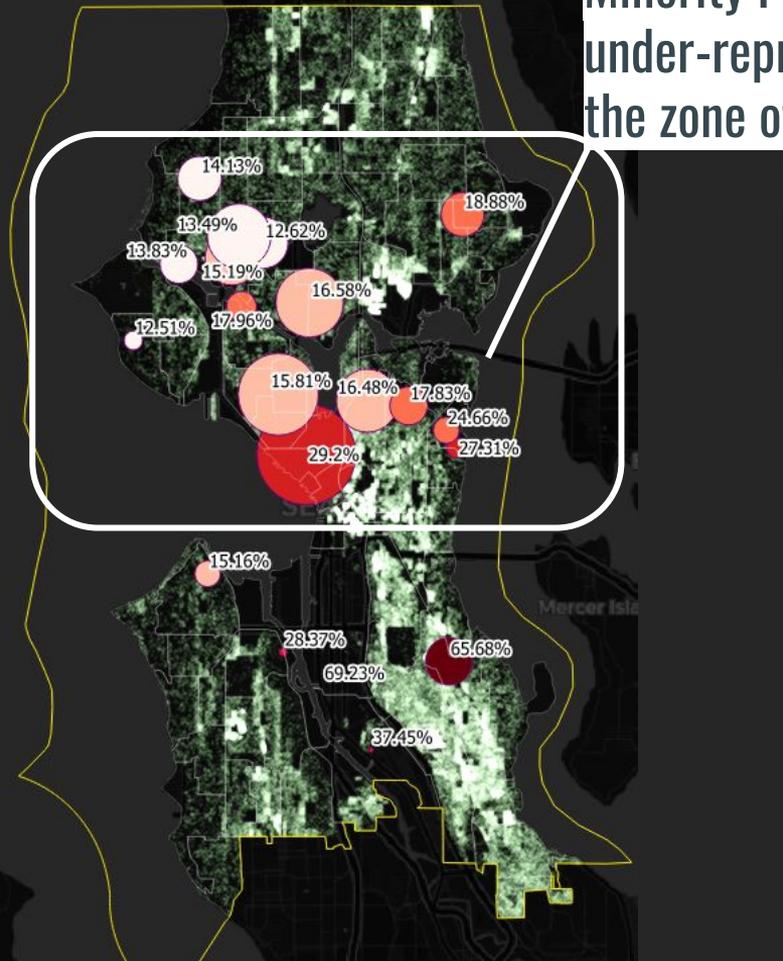

Minority Population Density (2010)

Majority Population Density (2010)

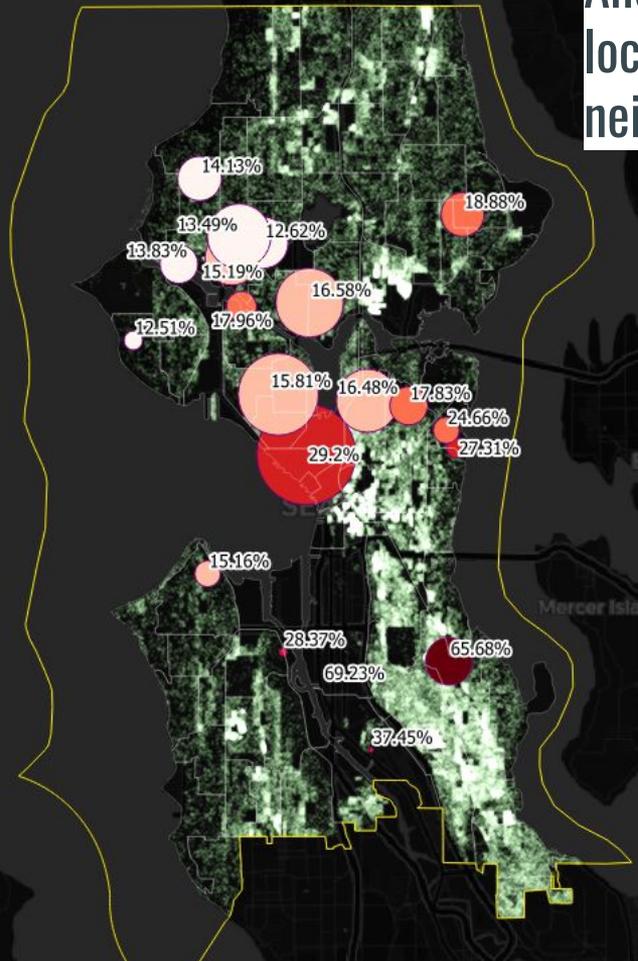

Minority Populations are under-represented within the zone of coverage

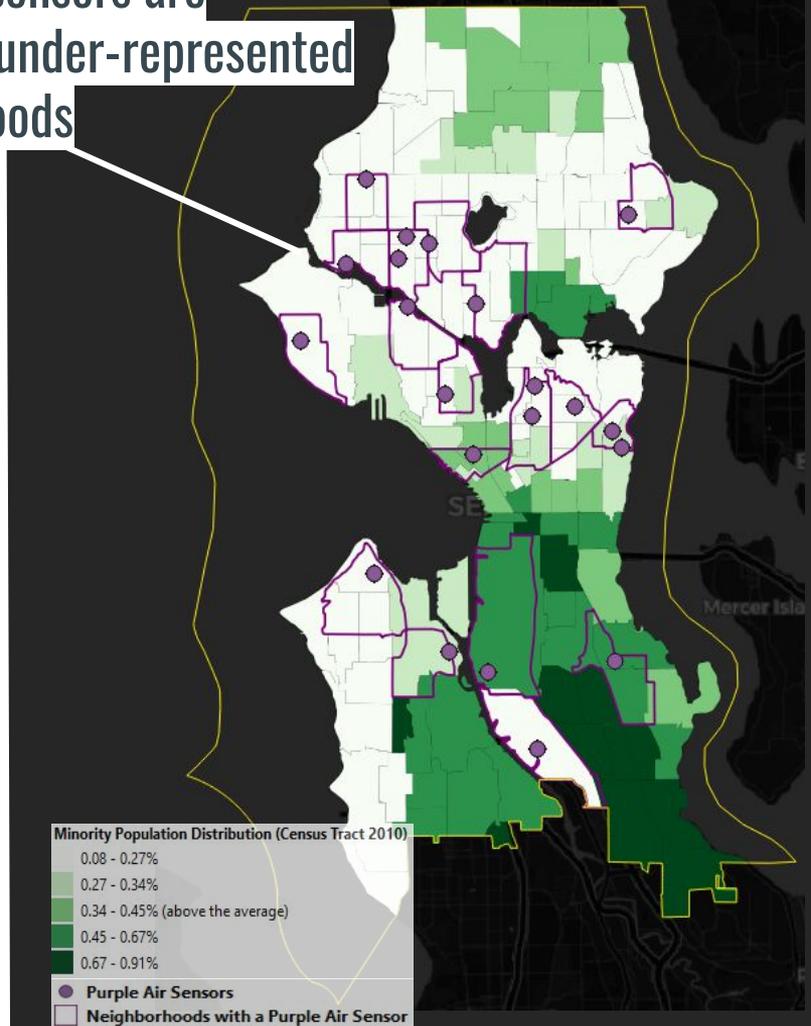

Minority Population Density (2010)

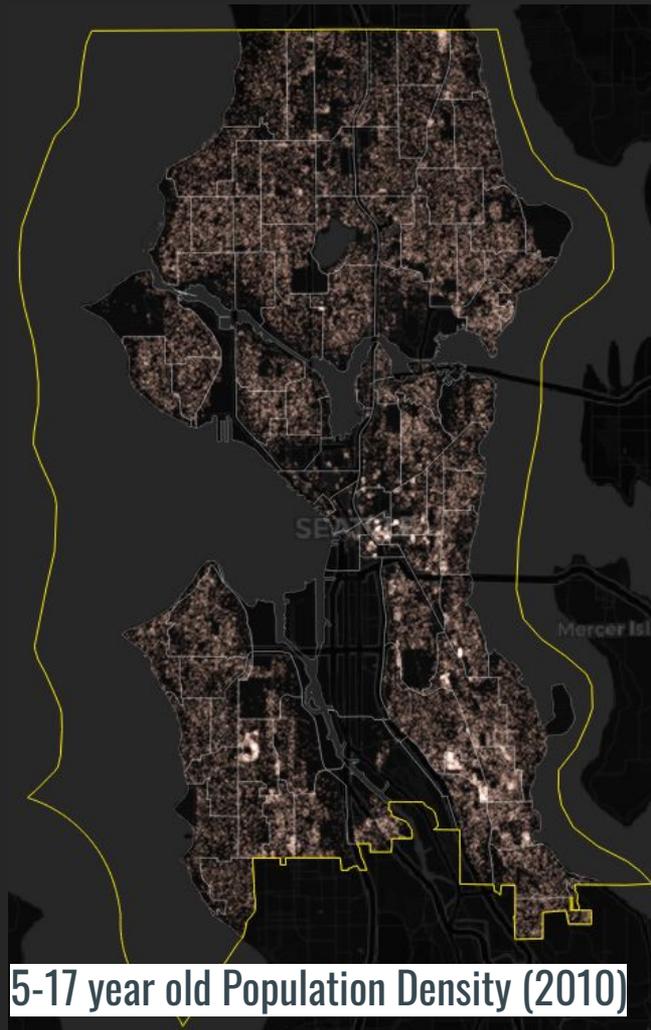

Majority Population Density (2010)

And most sensors are located in under-represented neighborhoods

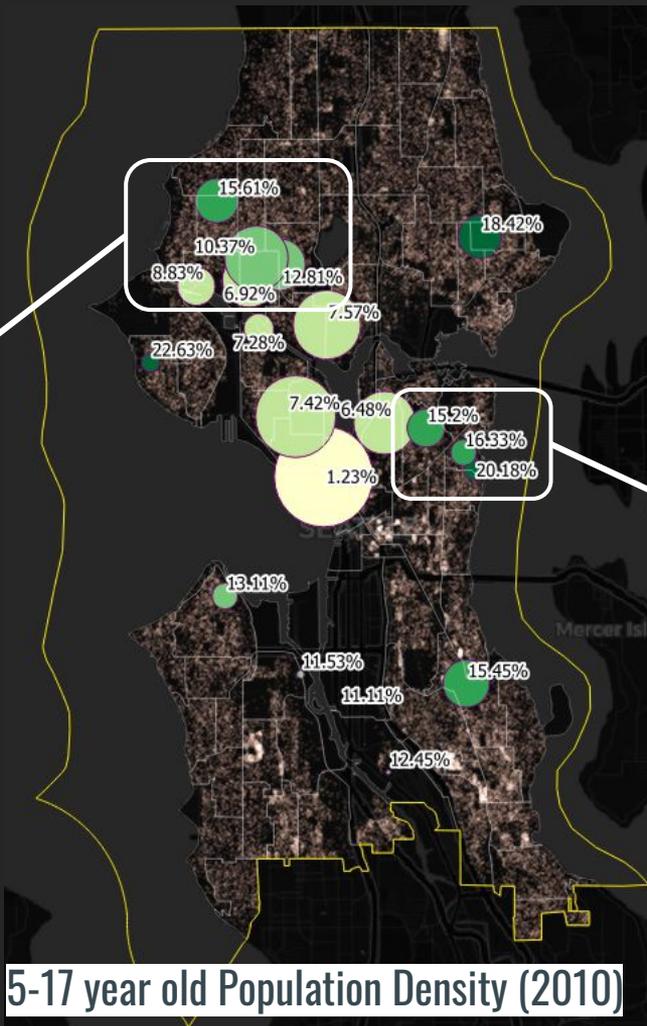

Minority Population Density (2010)

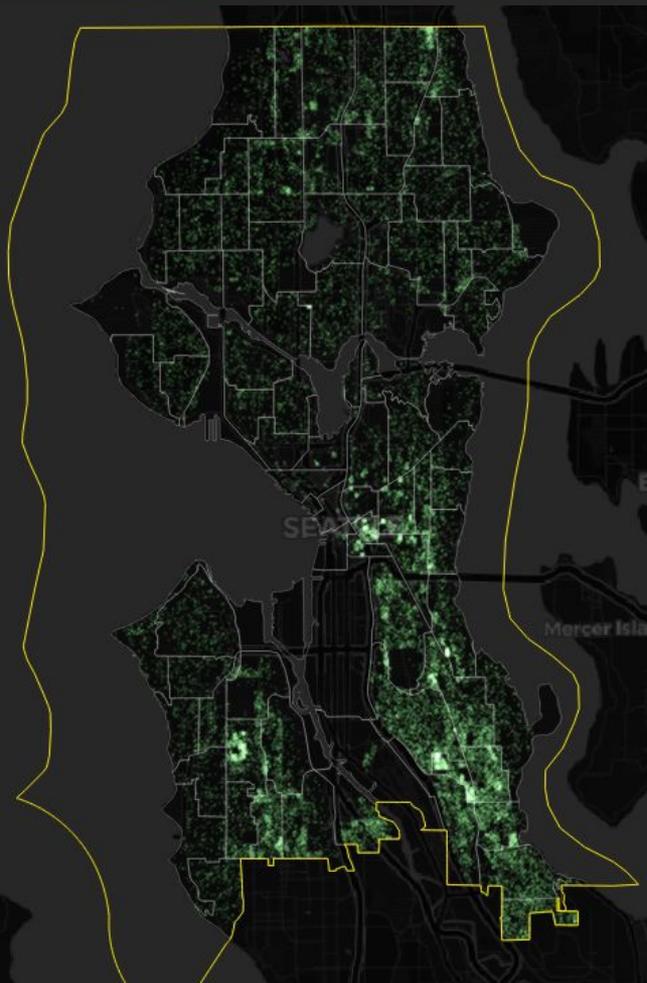

Adequate representation in Ballard District area

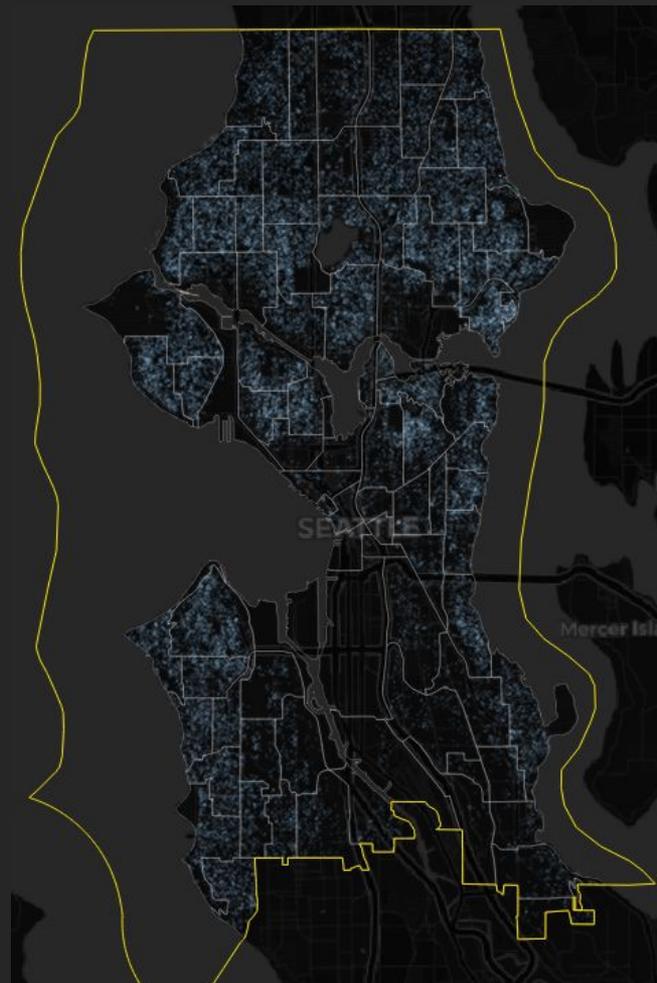

Adequate representation in Capitol Hill District area

5-17 year old Population Density (2010)

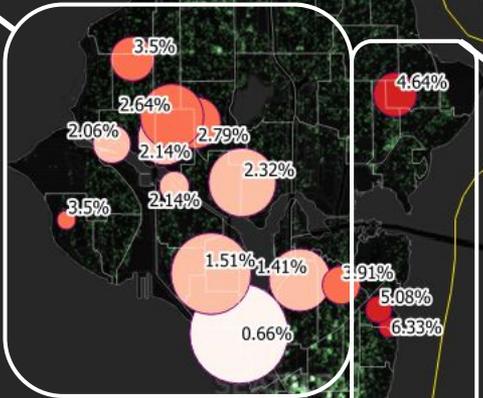

5-17 year old Minority Population Density (2010)

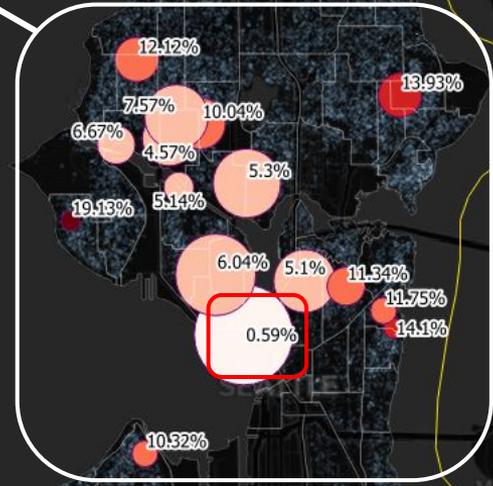

5-17 year old Majority Population Density (2010)

Under-represented in most of Northwest Seattle

Near-adequate representation

Well-represented in North Seattle

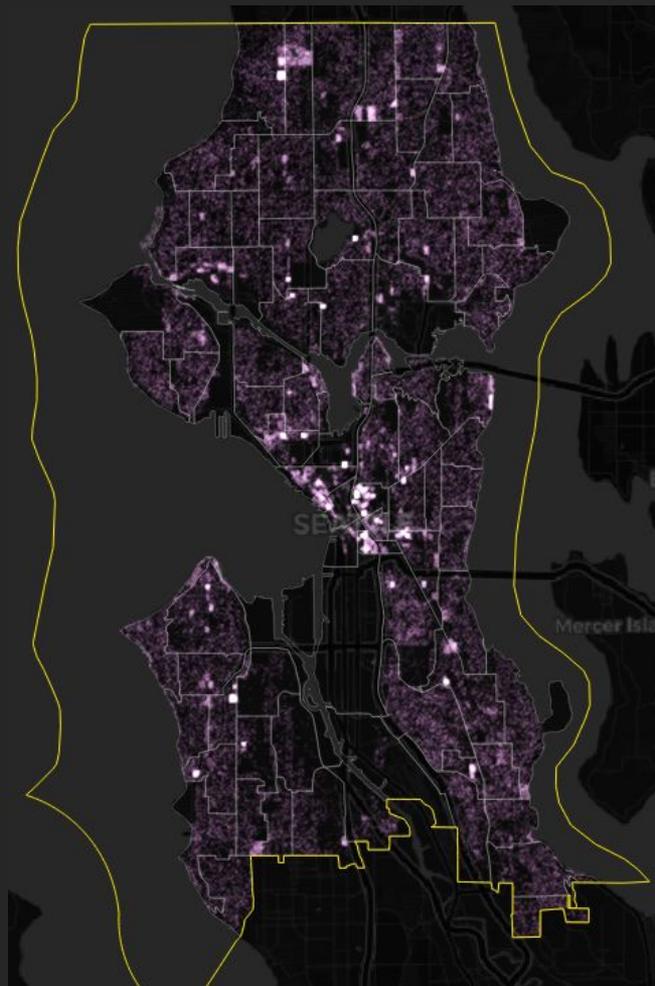

5-17 year old Minority Population Density (2010)

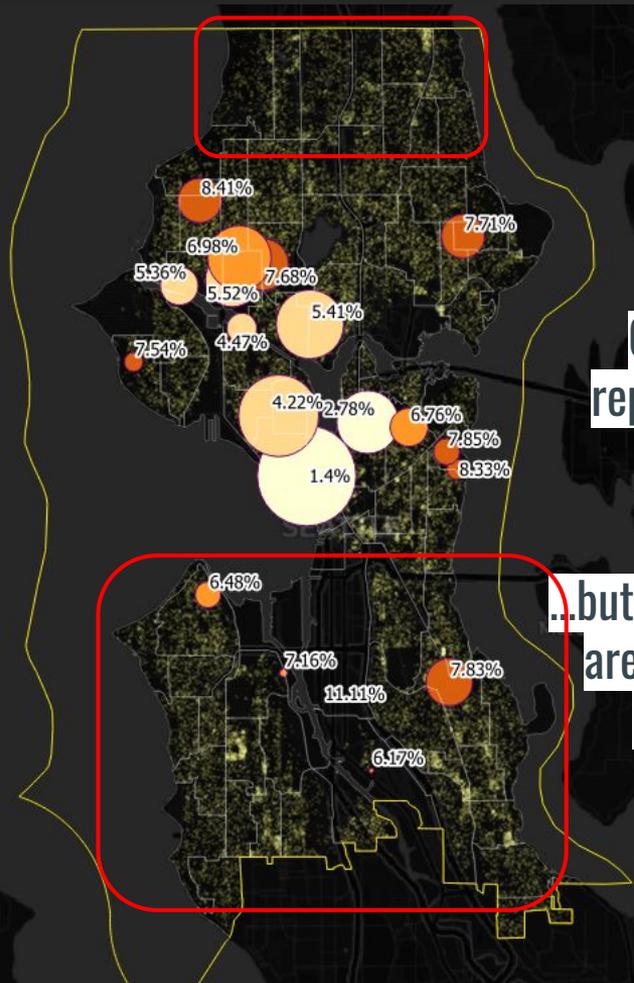

5-17 year old Majority Population Density (2010)

Under 5 year old Population Density (2010)

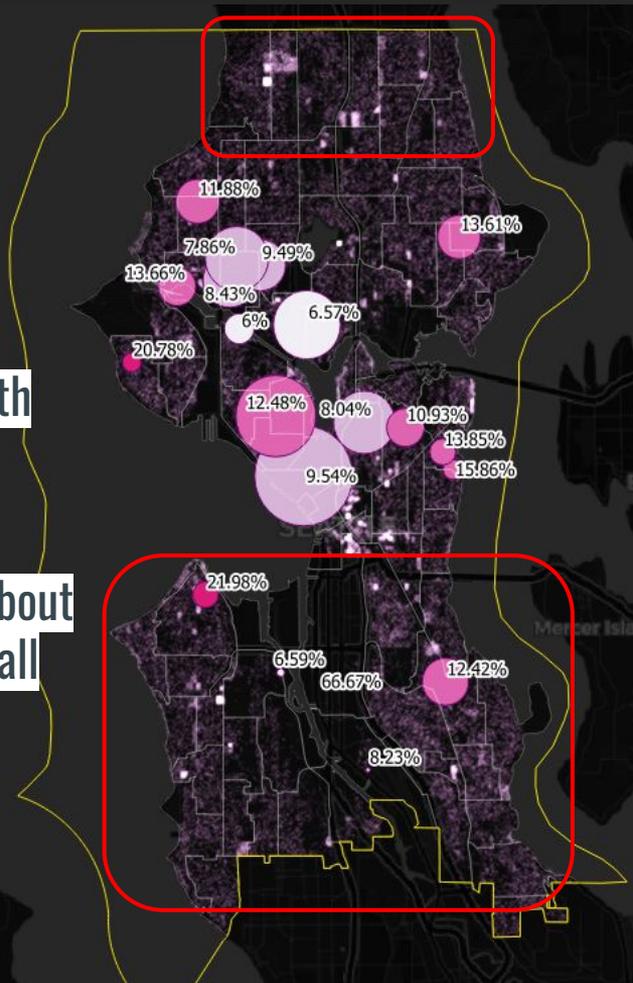

Over 65 year old Population Density (2010)

Coverage is mostly representative for both groups...

...but raises questions about areas with no or a small number of sensors

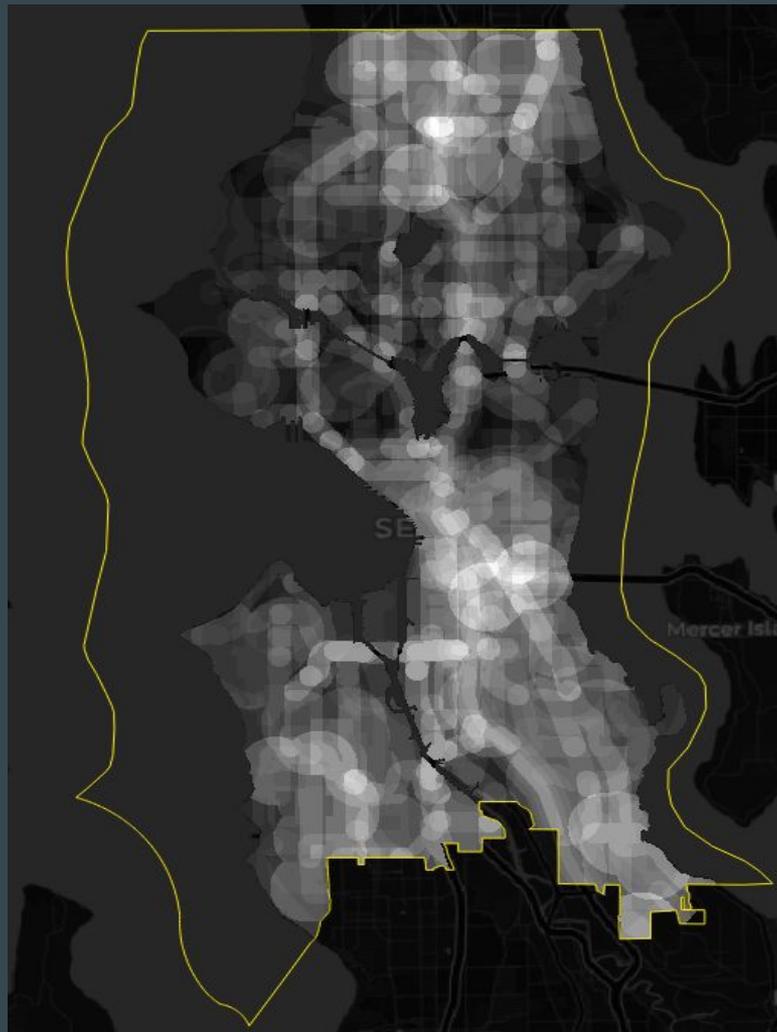

Under 5 year old Population Density (2010)

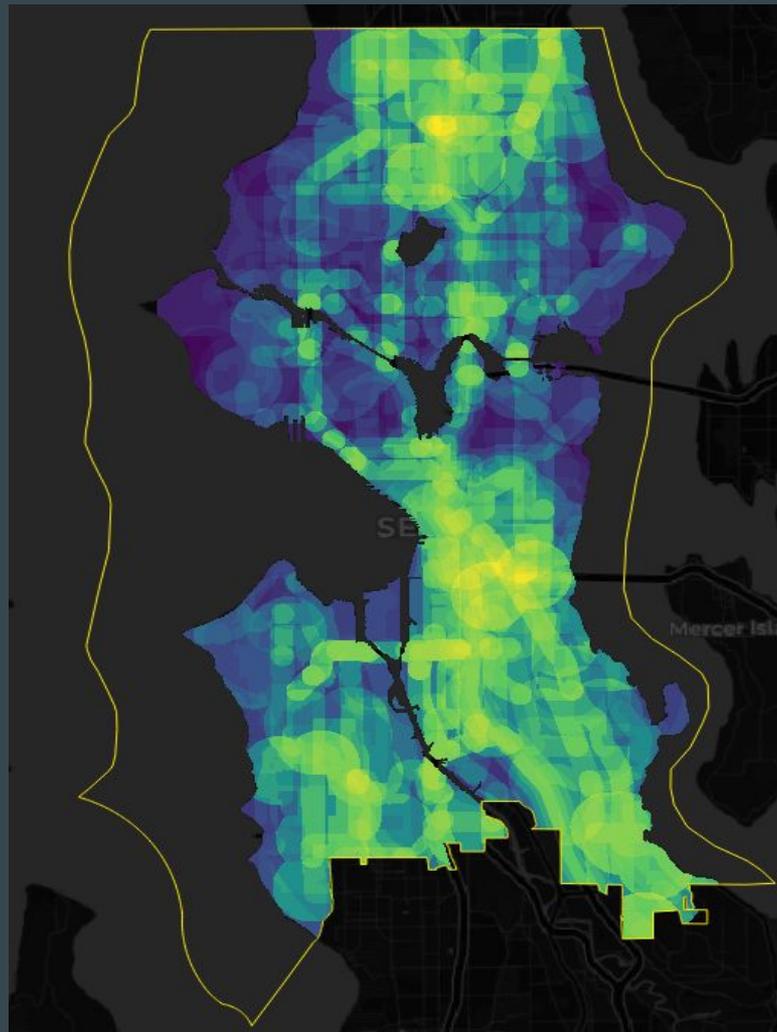

Over 65 year old Population Density (2010)

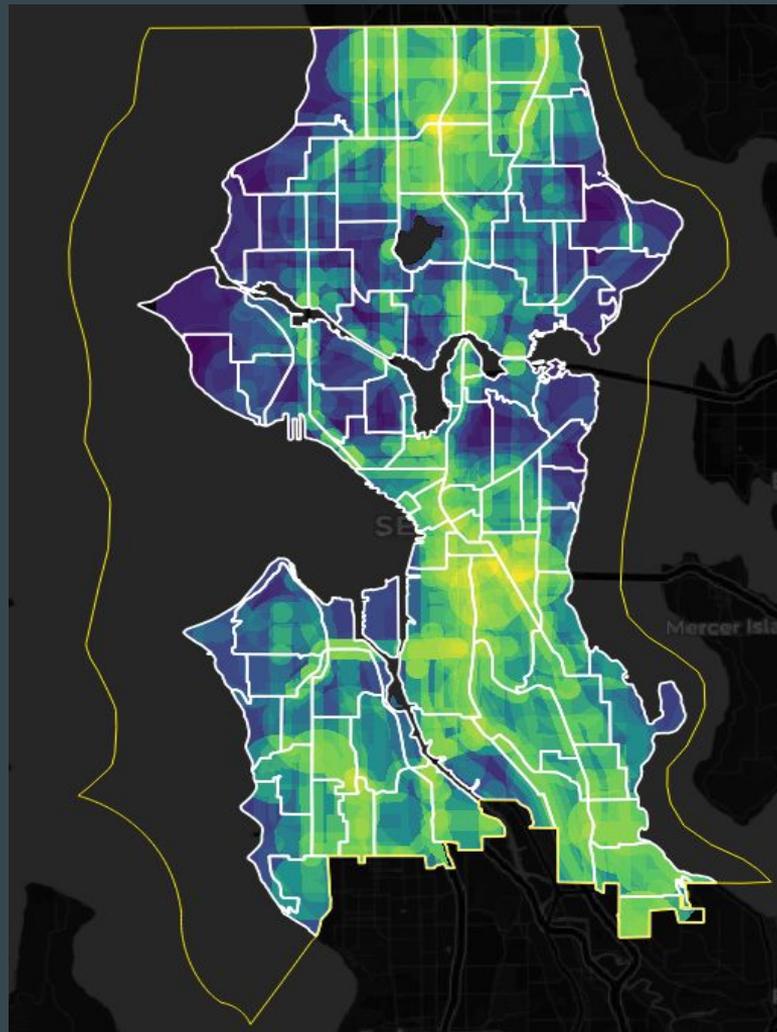

Identifying zones of community coverage in the city of Seattle, WA

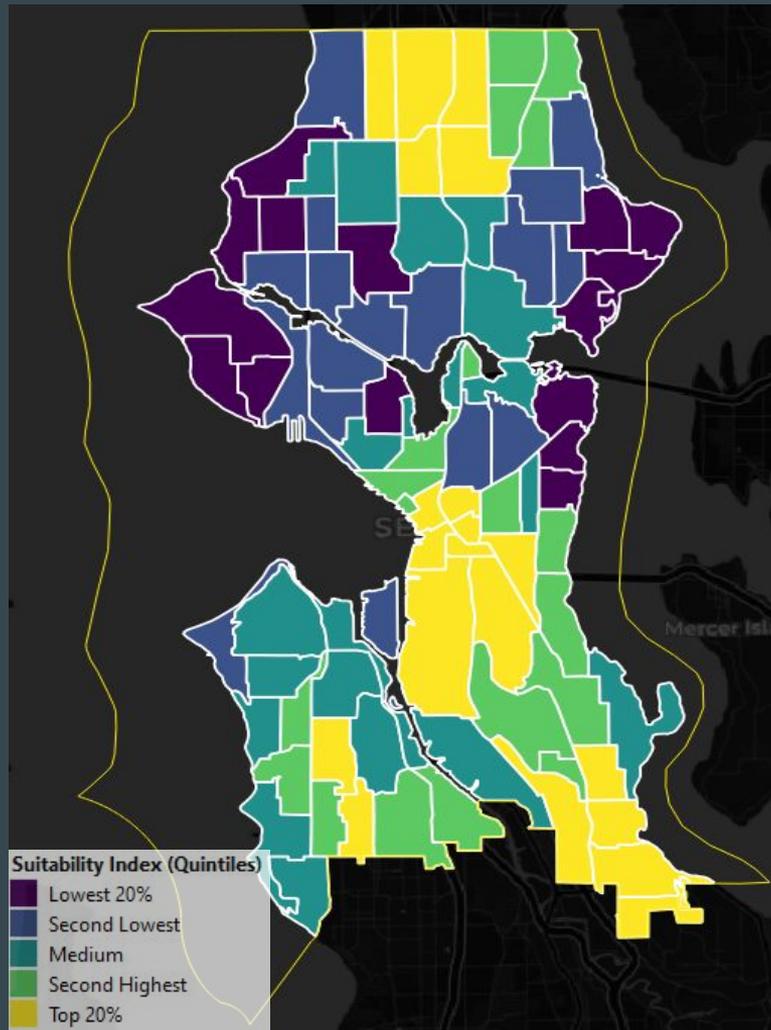

...

Using **multi-criteria weighted-overlay** analysis
to generate a **site-suitability model**

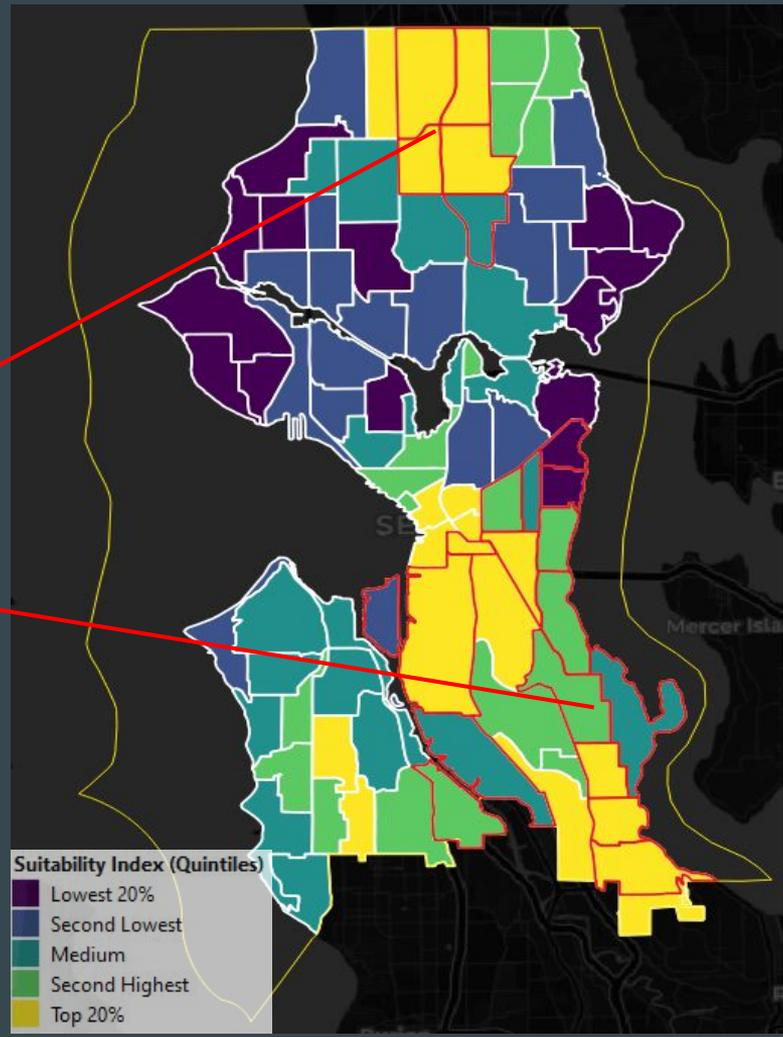

Highly Impacted Communities

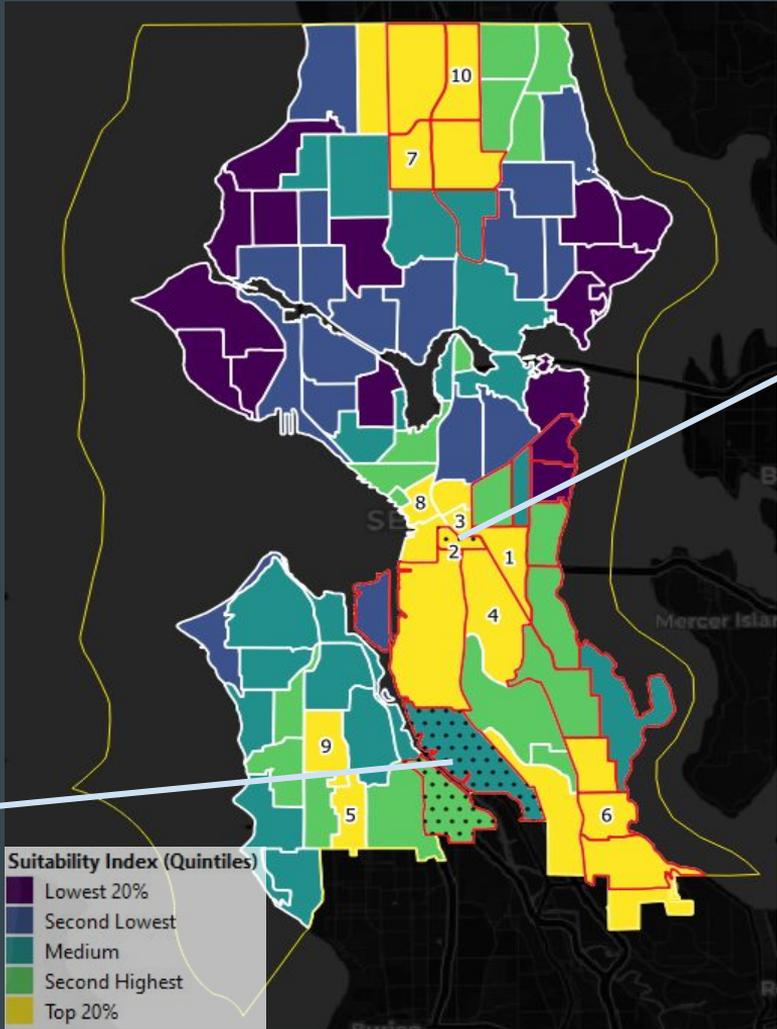

CAA (2014)

Focus Communities Program

Duwamish Valley

(Georgetown & South Park)

No. 1 Rank: Atlantic Neighborhood

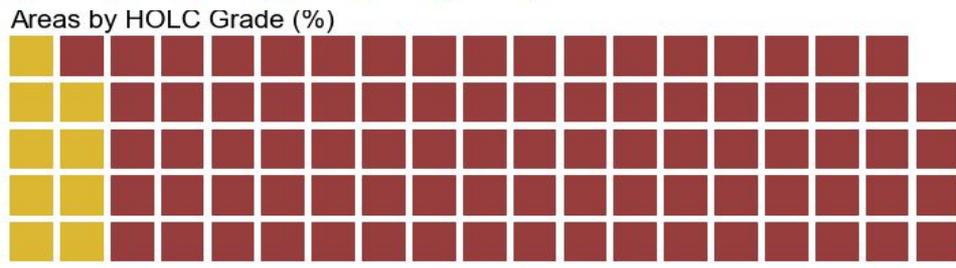

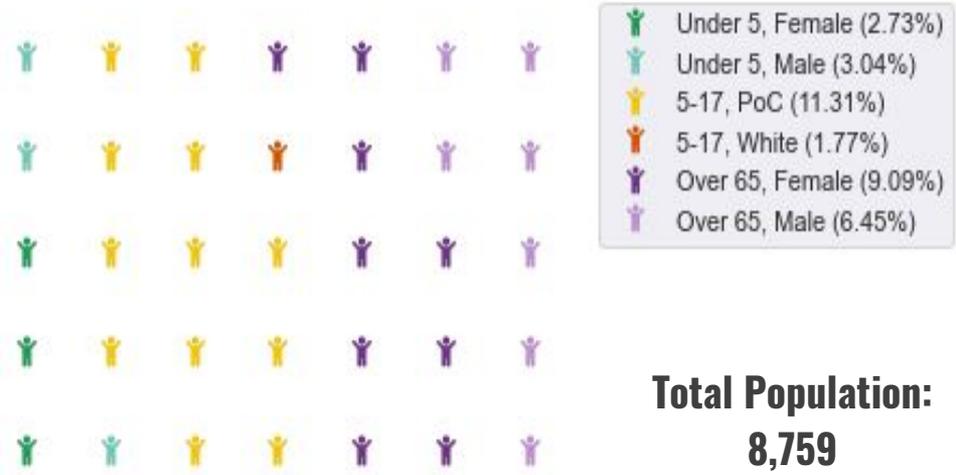

Total Population:
8,759

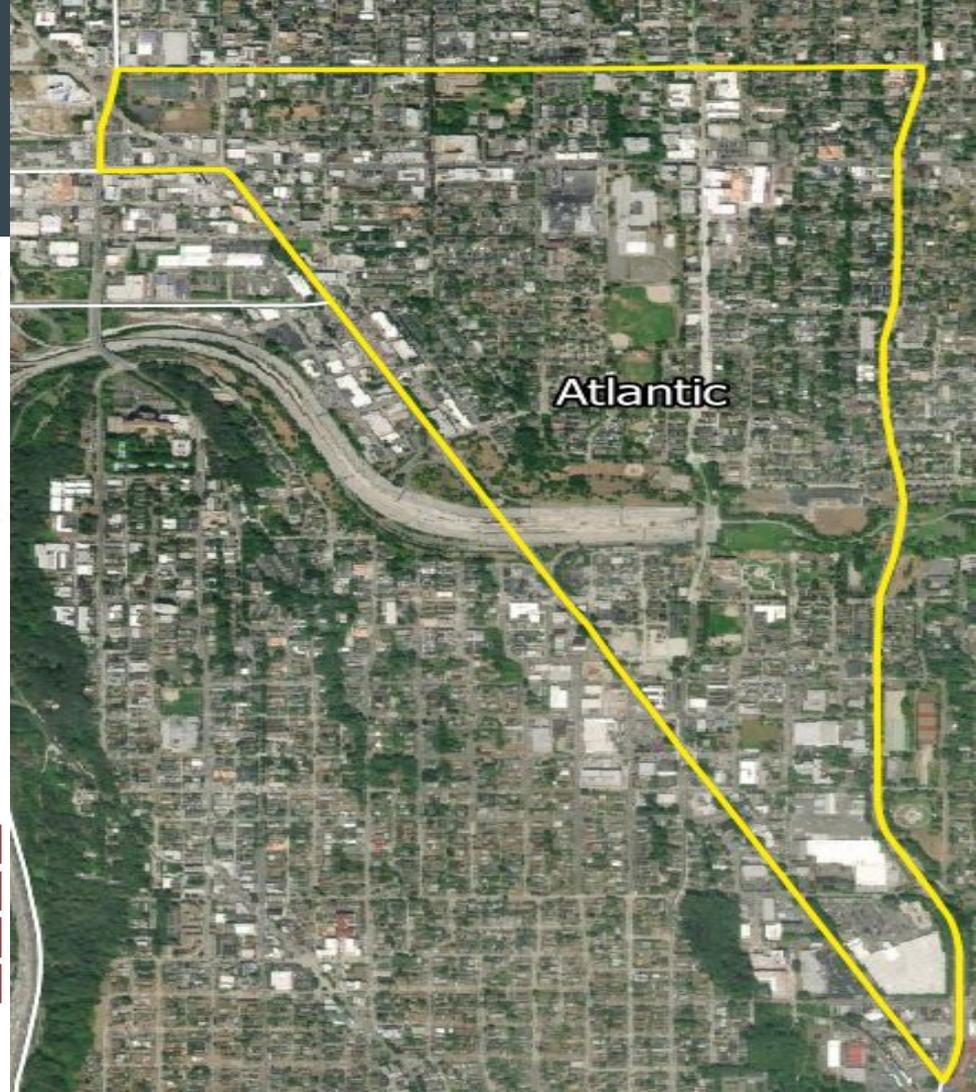

C-Definitely Declining (8.02%) D-Hazardous (85.86%)

No. 1 Rank: Atlantic Neighborhood

C-Definitely Declining (8.02%) D-Hazardous (85.86%)

Which were the included criteria?

PUGET SOUND
Clean Air Agency

Race

Diesel pollution
(onroad and nonroad)

Health sensitivity
(asthma, cardiac illness, etc)

CRITERIA

Household income

Limited english proficiency

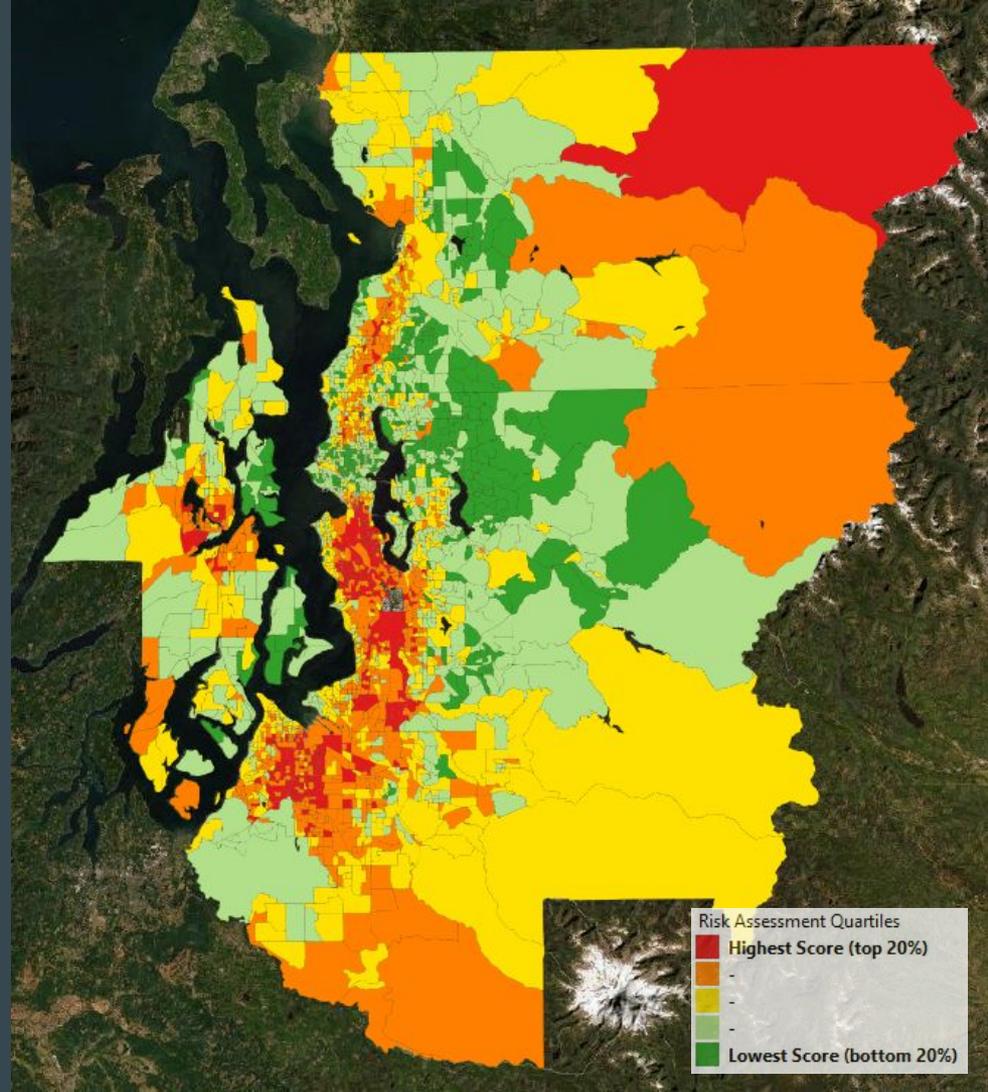

Industrial density
(large & small pollution sources)

Primary wood burning households

Highly Impacted Communities

2014-2020 PSCAA's Strategic Plan

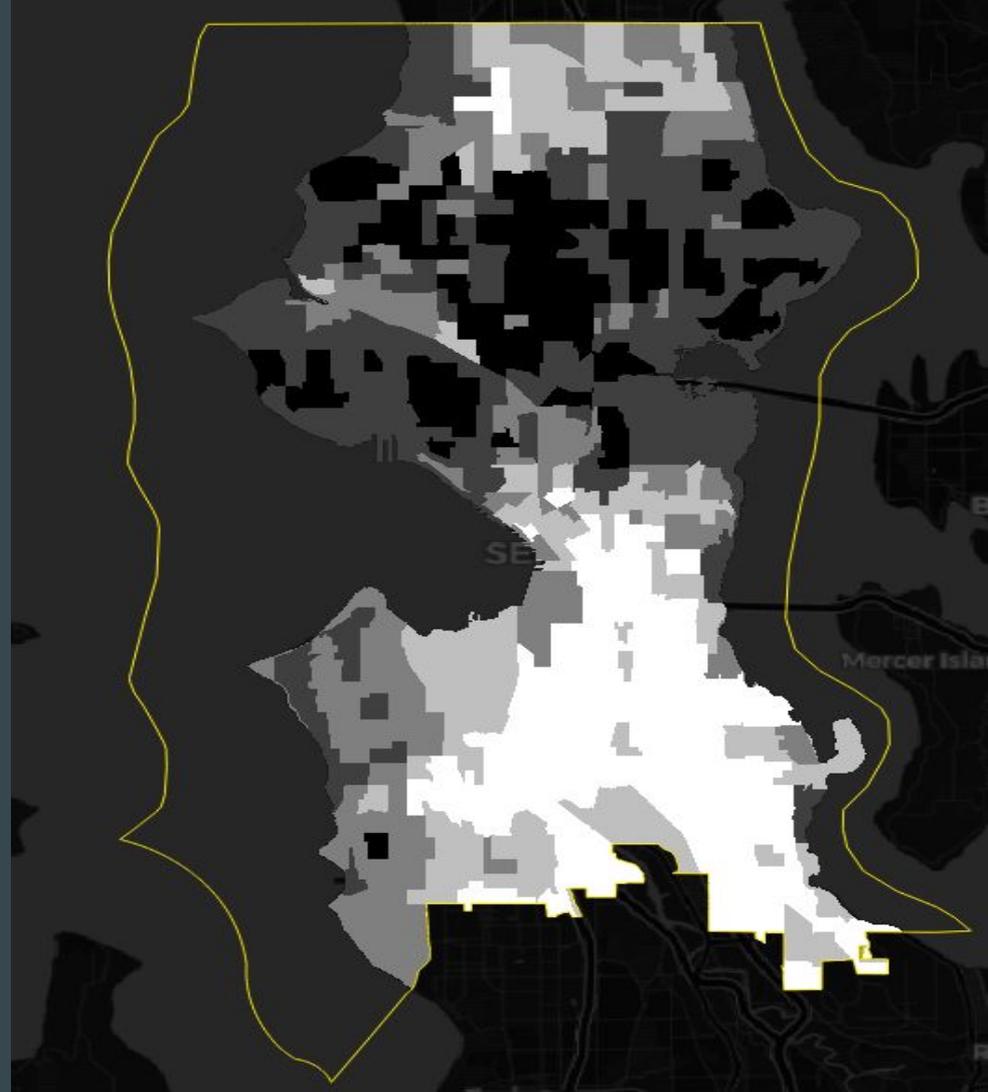

Highly Impacted Communities

City of Seattle only

Weight Assignment

Top Quintile = 100 (white)
Second Quintile = 80
Third Quintile = 60
Fourth Quintile = 40
Lowest Quintile = 20 (black)

**Office of Planning & Community Development
Seattle GeoData**

Racial and Social Equity Composite Index

Lowest Quintile = 20 (black)

PurpleAir

Weight Assignment

- Proximity $\leq 1,000$ m; = 25 (black)
- Proximity $\leq 3,000$ m; = 50
- Proximity $\leq 6,000$ m; = 75
- Proximity $> 6,000$ m; = 100 (white)

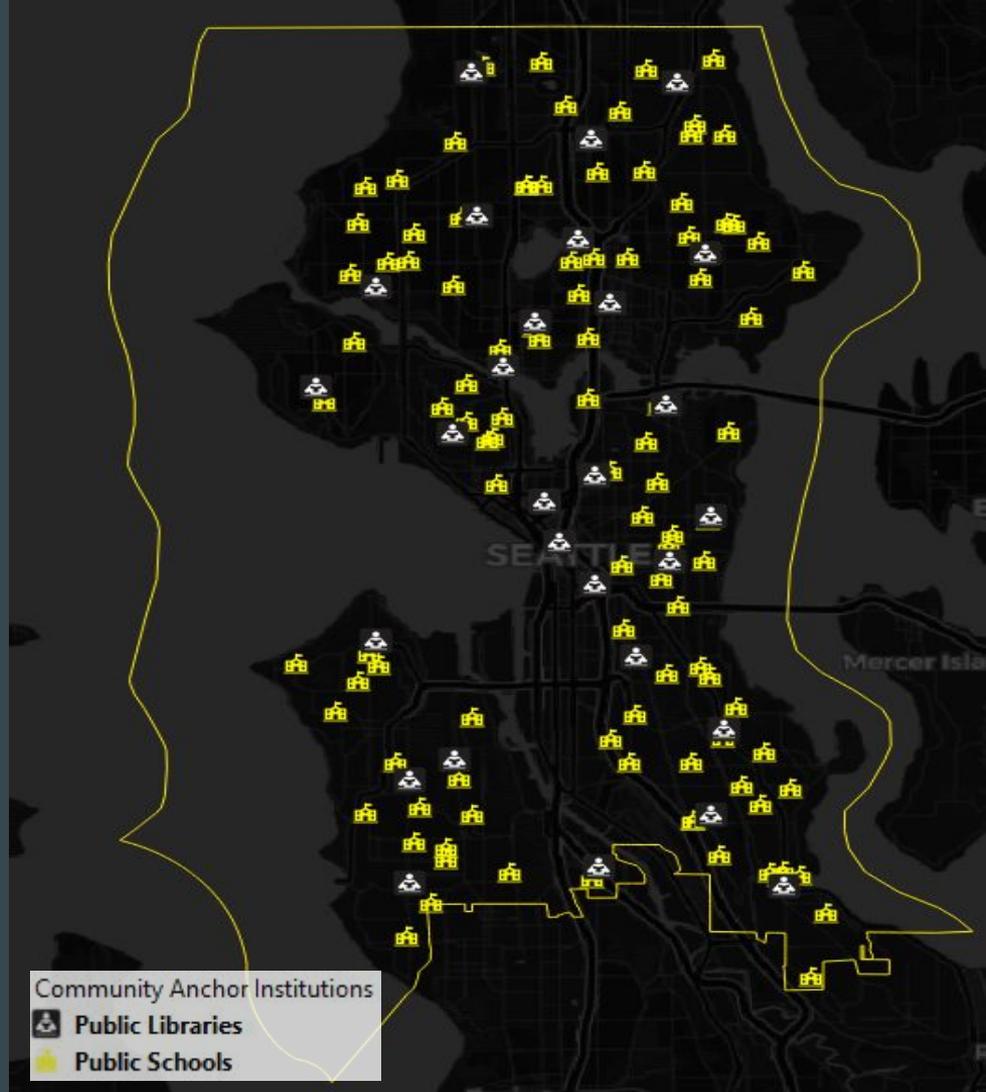

Anchor Community Institutions: Public Schools & Libraries

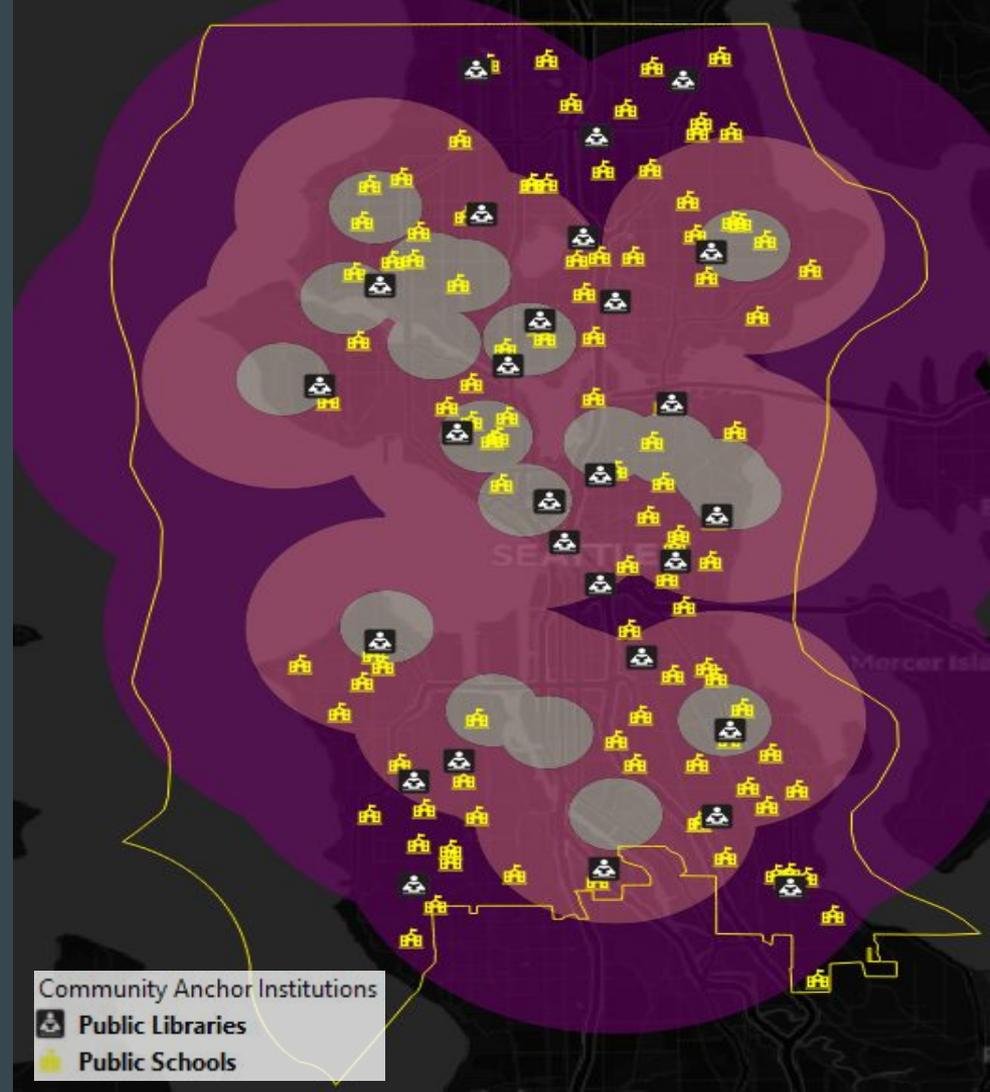

Seattle GeoData

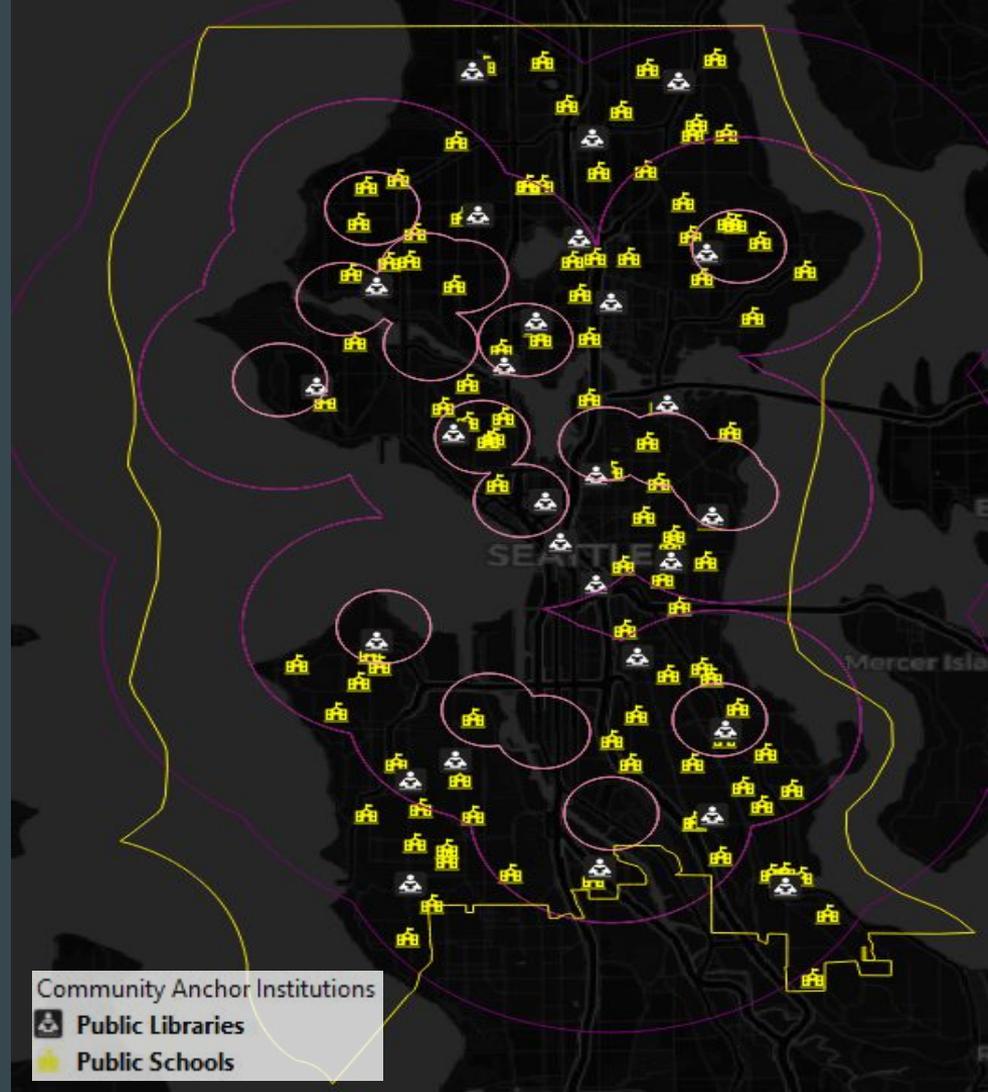

Community Anchor Institutions as candidate sites to host low-cost sensors

Avoiding possible
redundancies with
existing PurpleAir's
zone of coverage

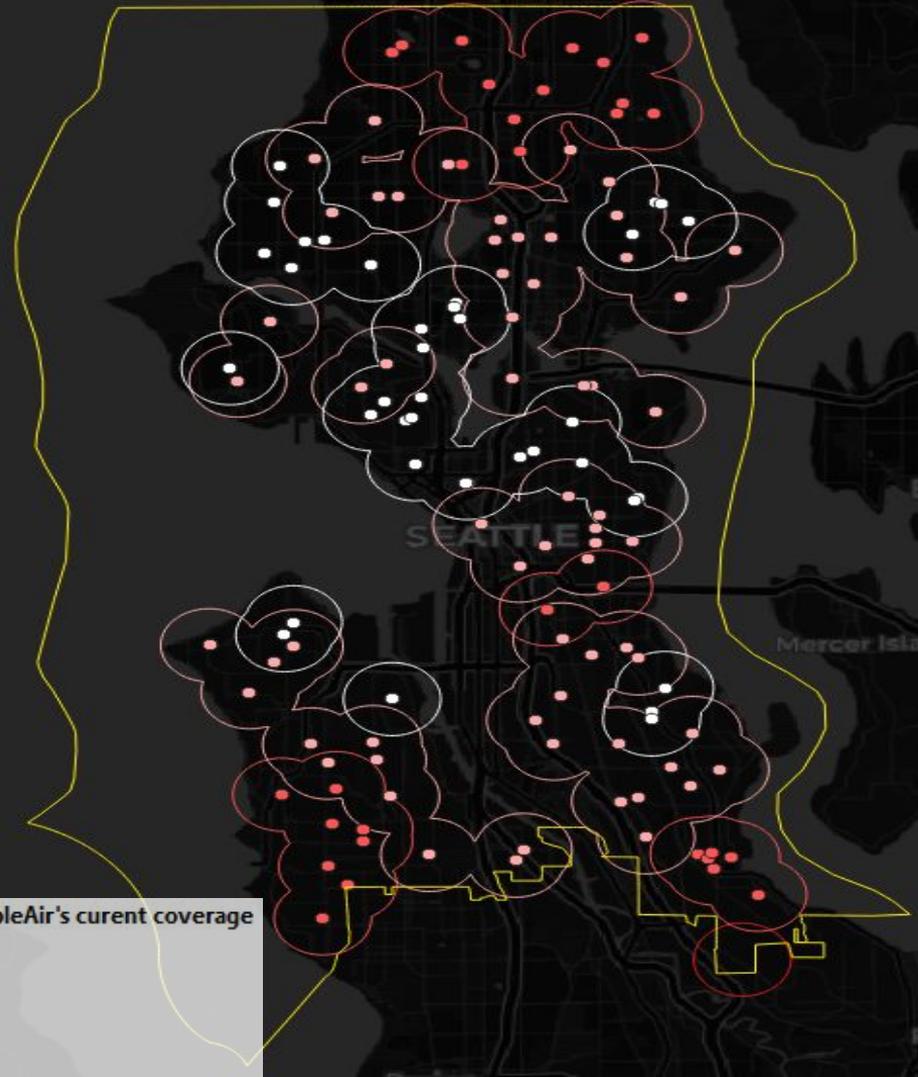

Intersecting known coverage with anchors' location

Assigning a weight
within 1,000 m of an
anchor institution,
based on proximity to
PurpleAir's current
coverage.

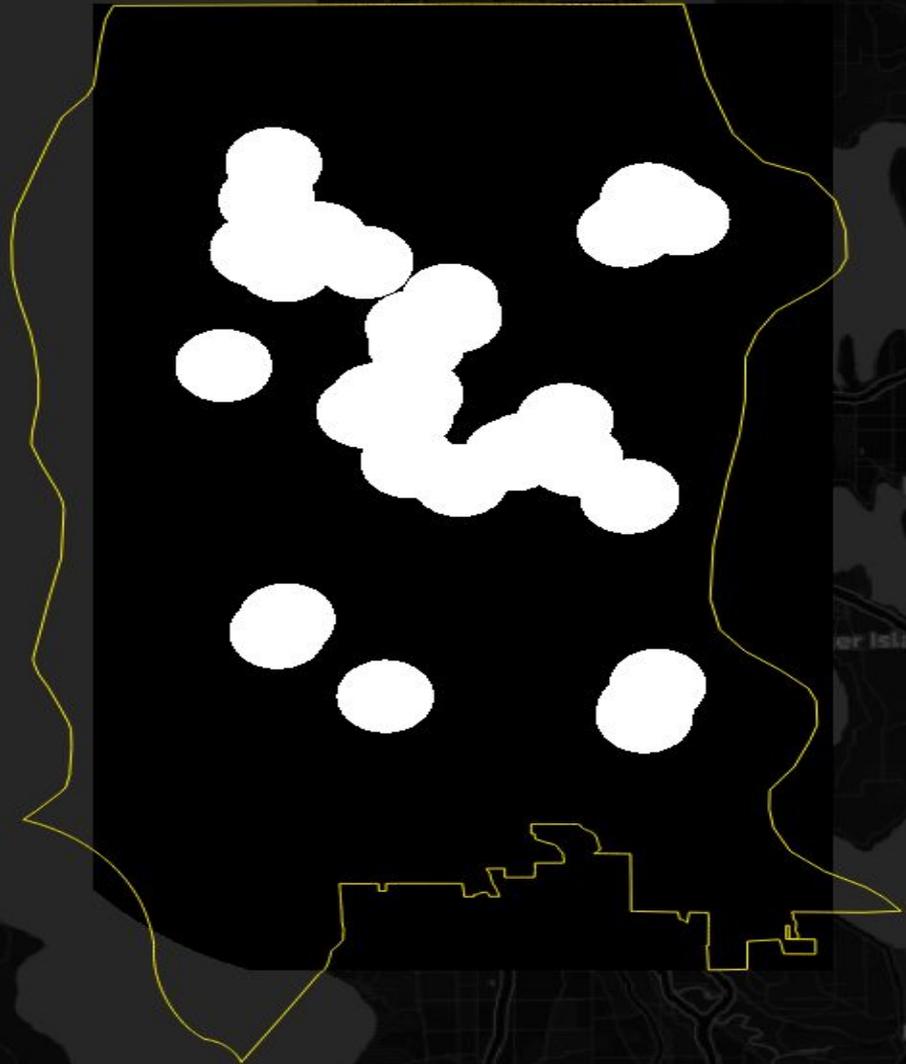

Community Anchor Institutions Placement relative to PurpleAir's current coverage

- Within 1,000 m of PurpleAir Sensor coverage
- ◐ Within 3,000 m of PurpleAir Sensor coverage
- ◑ Within 6,000 m of PurpleAir Sensor coverage
- Beyond 6,000 m of PurpleAir Sensor coverage

Weight Assignment

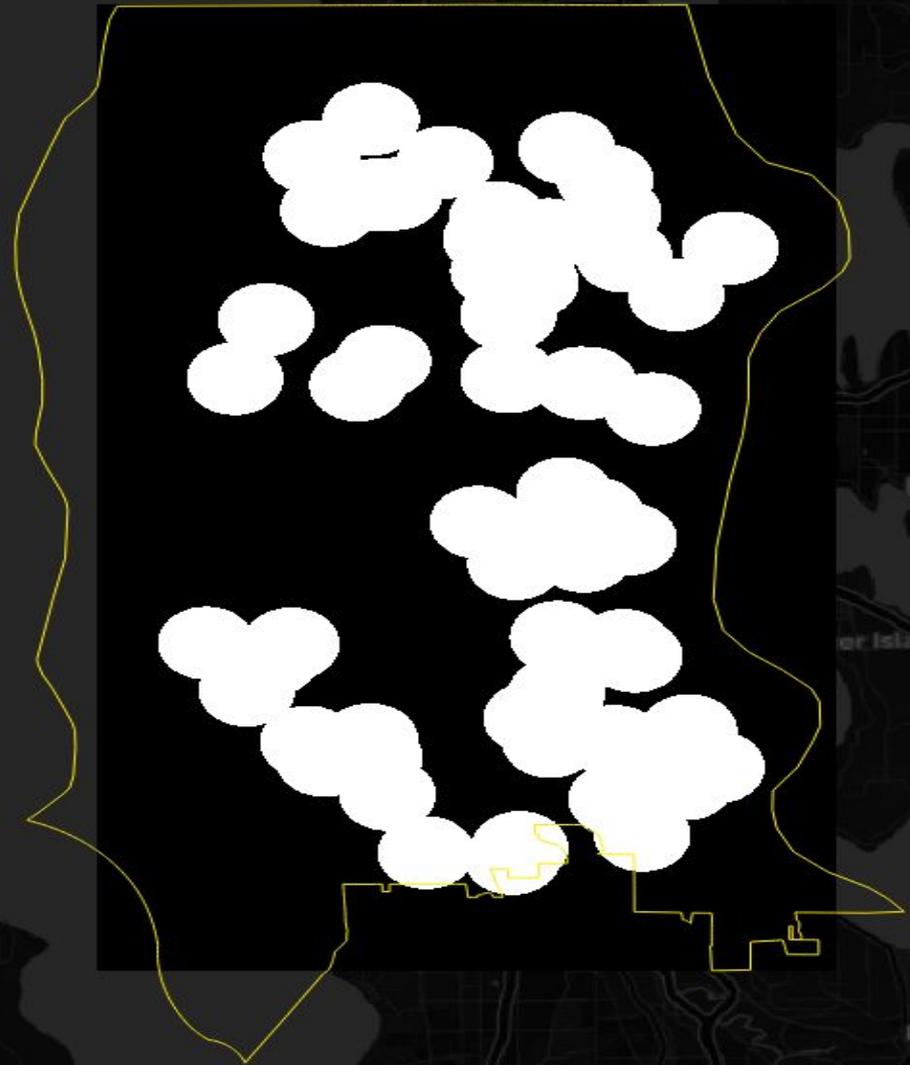

Within 1,000 m of PurpleAir = 20

Weight Assignment

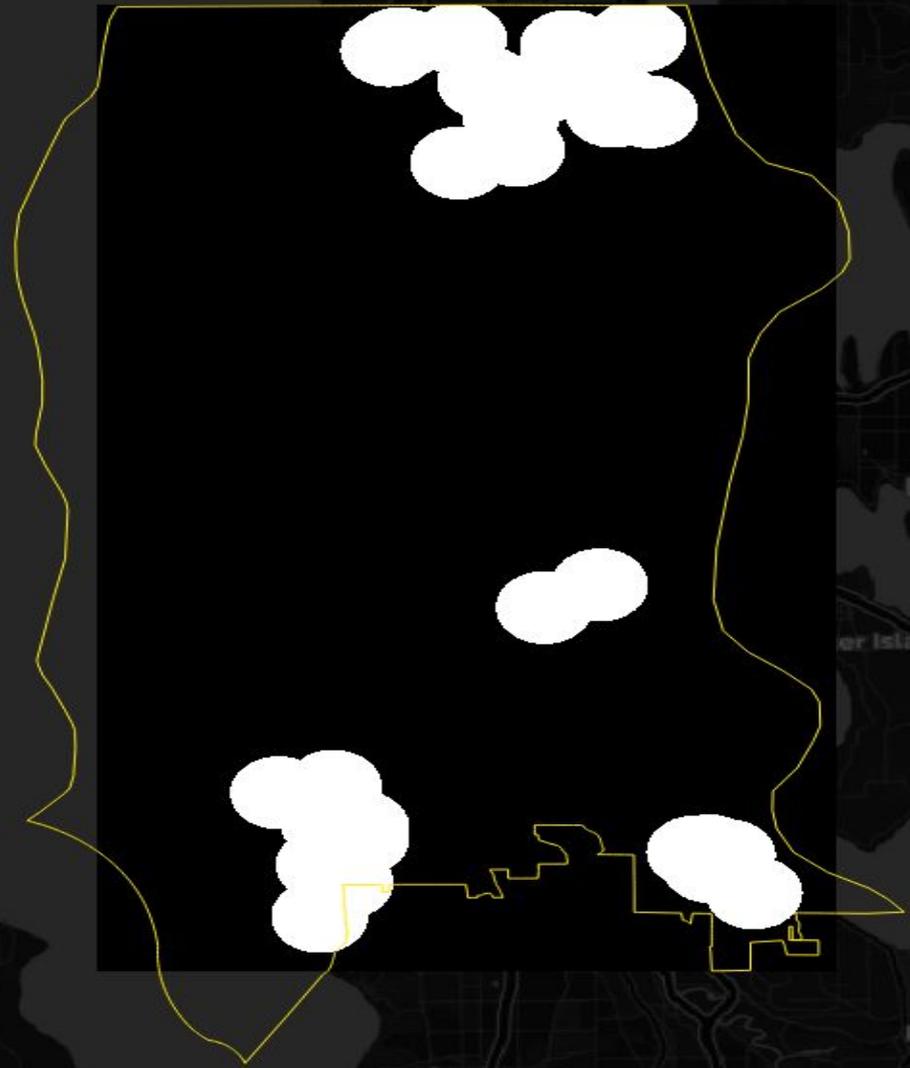

Within 1,000 m of PurpleAir = 20

Within 3,000 m of PurpleAir = 60

Weight Assignment

- Within 1,000 m of PurpleAir = 20
- Within 3,000 m of PurpleAir = 60
- Within 6,000 m of PurpleAir = 100

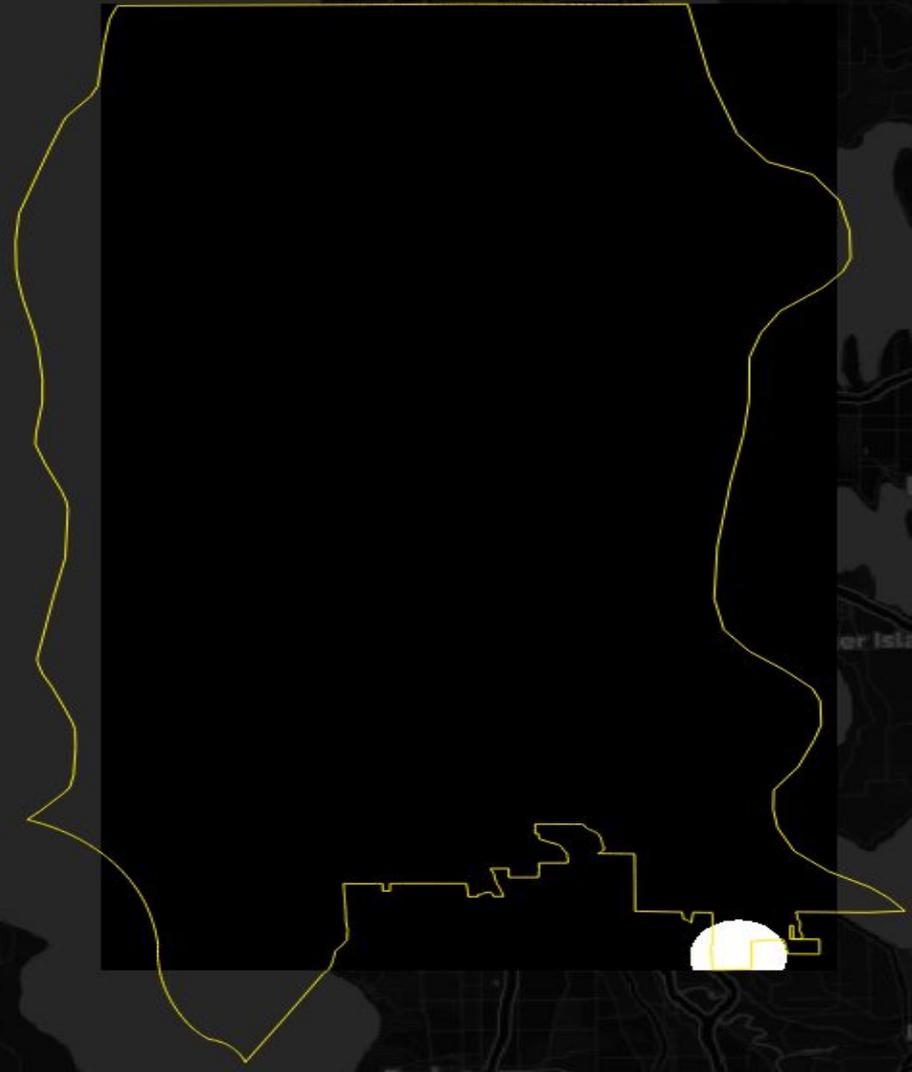

Weight Assignment

Within 1,000 m of PurpleAir = 20

Within 3,000 m of PurpleAir = 60

Within 6,000 m of PurpleAir = 100

Beyond 6,000 m of PurpleAir = 150

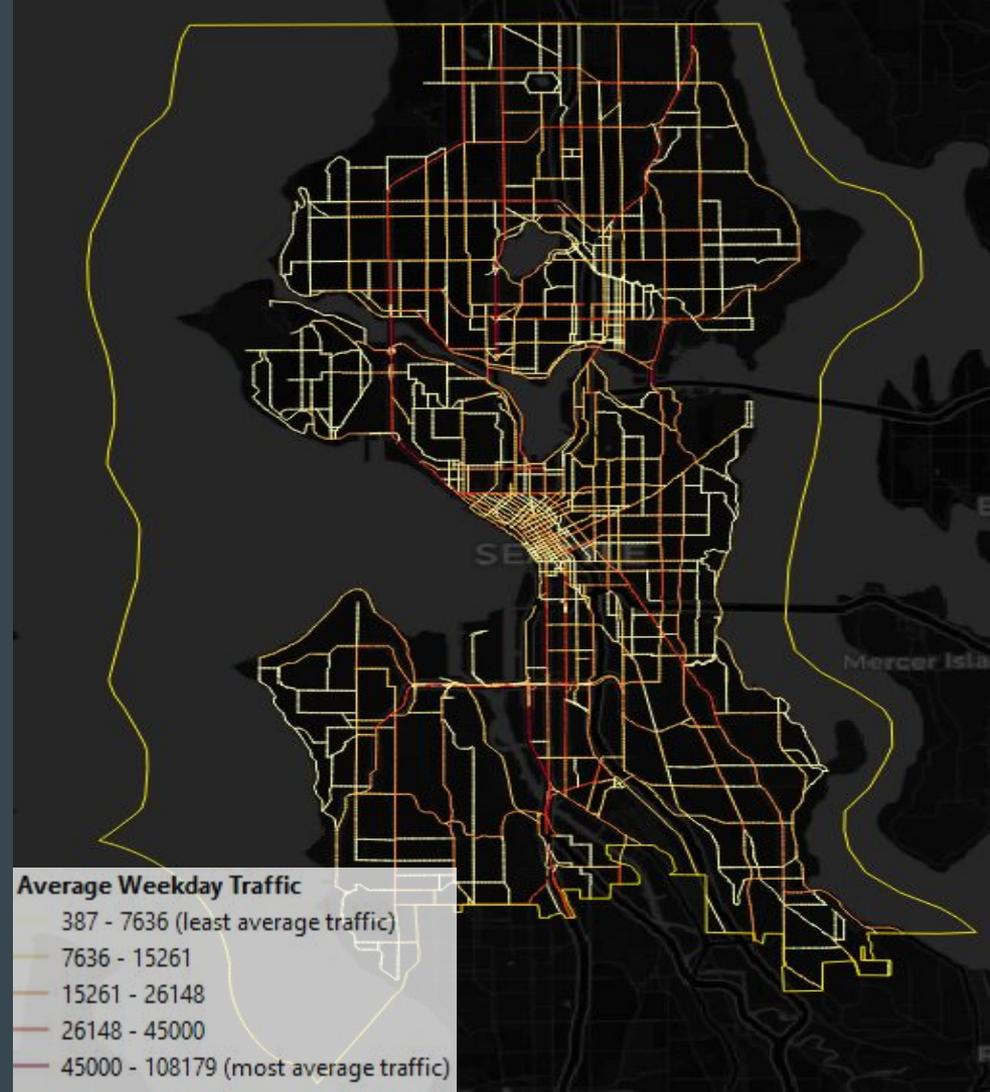

Traffic Flow

```

Expression valid

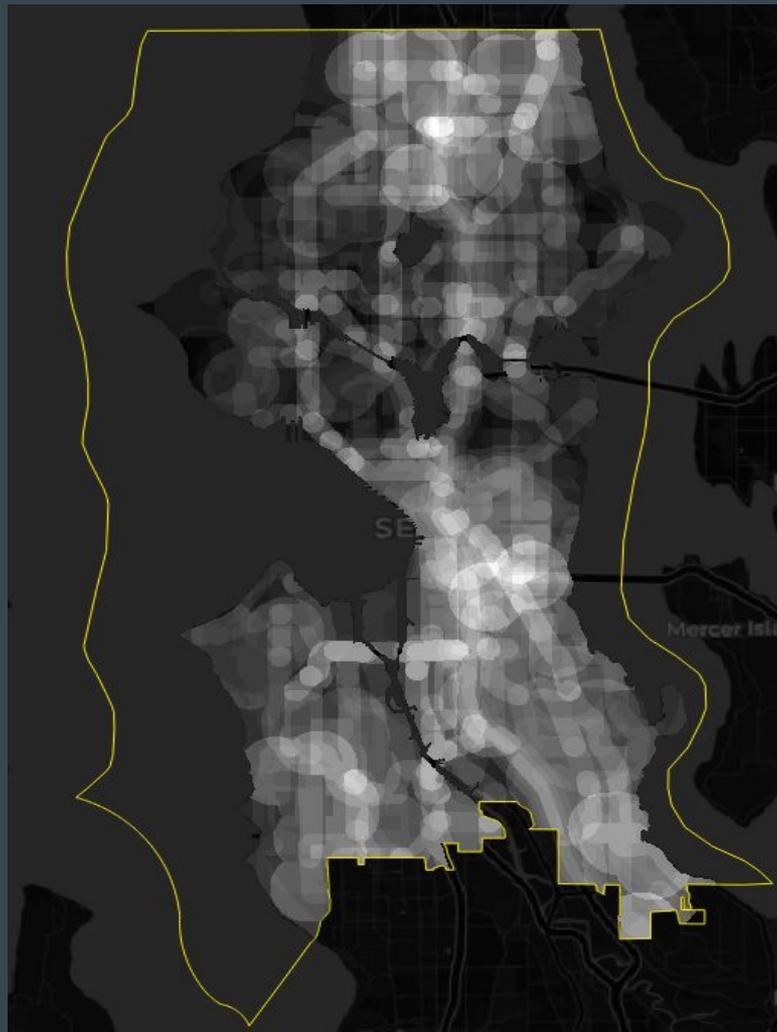

Reservations

"Happy families are all alike; every unhappy family is unhappy in its own way."

Modelling with Community/Local Knowledge

Impact of COVID-19

Looking beyond Fine Particulate Matter Pollution

Recommendations

Incorporate historical context of local communities to strategically scope Environmental Justice Communities

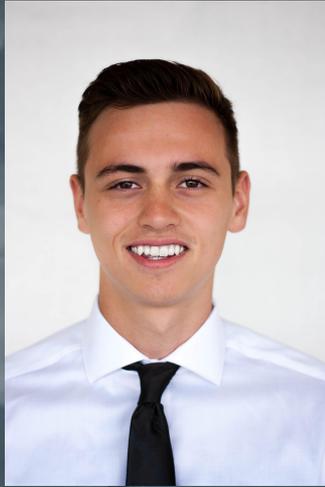

Involve public participation in the Criteria Selection process

Make research openly available, accessible, and legible

Open-data is the future

Thank You!
